NUIG Students help with 3rd Year Subject Choice Information

On March 14th 2007 five University Students from NUIG came and spoke to our 3rd Year students. The aim of these talks were to help our students make good and informed subject choices for Leaving Certificate.

The University Students are currently studying:

Commerce		Corporate Law
Arts	Science (Pharmacology)	Biomedical Engineering

Each spoke to all students in rotating groups. Thus each group had a chance to hear about all the 5 different disciplines and to ask questions about the links between school subjects and those University Courses. This is a new feature which has been added into our Subject Choice Information Process and our own students found it very helpful. Many thanks to Ashla Ward of NUIG for co-ordinating this event and also to the NUIG Students who volunteered their time to help our students.
